# Agenda

- CMS Introduction
- Brief Overview of CMS-0057-F Prior Authorization
- Proof of Concept Demonstration of PAs Implementation Guides
- Lessons Learned
- Hands On Exercise
- Next Steps

# MITA Governance Board Activities

#### MITA Governance Board

- Re-established in 2023.
- Made up of representatives from CMS, States and the Vendor community.
- Refresh MITA to focus on outcomes and practical guidance.
- Established four work groups to create useful tools, templates and direction to support states.

#### CMS Goals for MITA

- Make MITA more meaningful and accessible
- Reduce burden on states
- Enable automation
- Tighten integration with APD/Certification activities
- Release guidance that is aligned with current trends in healthcare and IT

## Work Groups

#### MITA Next Gen

- Evolve the Business, Information and Technical Architecture to promote healthcare
- Reduce burden, enhance automation
- Make MITA meaningful and accessible

# State Self Assessment

- Produce an approach and toolkit containing guidance and templates to assess and monitor outcomes
- Redesign and refine the State Self-Assessment

## Work Groups

MITA Communica tions

- Increase interest and awareness of MITA 4.0
- Quarterly newsletters; Reusable communication; Outreach

MITA Interoperability

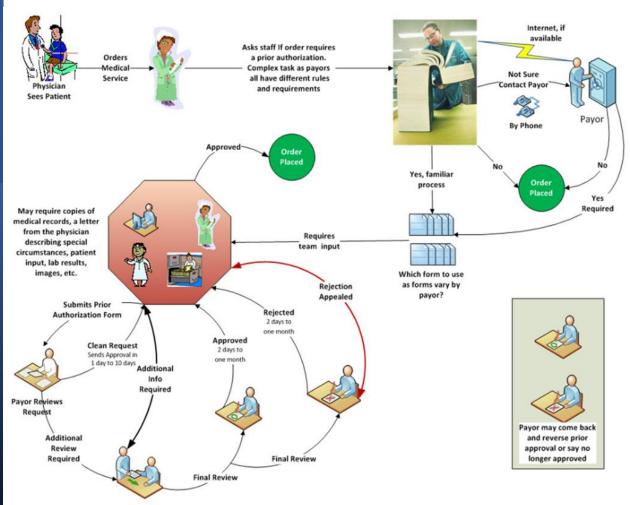

- Leverage MITA to extend interoperability principles and open standards, including FHIR
- Provide guidance to extend interoperability beyond current implementation guides

#### Overview of CMS-0057-F Prior Authorization Processing Requirements

#### Prior Authorization Process Today

# **Prior Authorization Today**

On average, practices complete

Two in five or 35% of physicians have staff who work exclusively on PA

88%

of physicians describe the burden associated with PA as high or extremely high

2022 AMA prior authorization (PA) physician survey

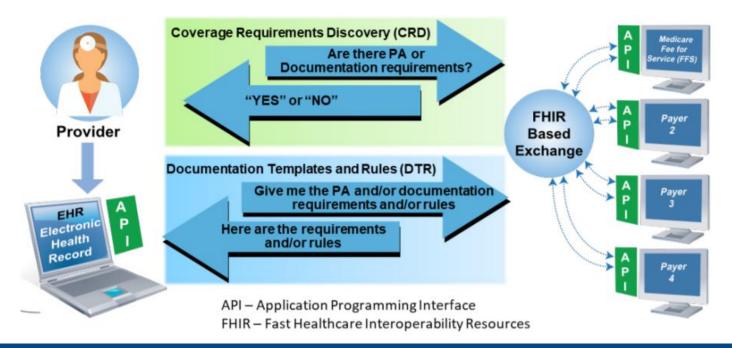

# Current PA process results

- Providers indicate that patient care is delayed due to current PA policies.
- Initial PA denials are often approved upon appeal.
- Documentation requirements for PA has increased over past several years.
- Providers report PA denials lack consistency in reasoning.

Source: National Association of Health Access Management

# Streamlining PA Decisions

August 12, 2024

## Updated PA Business Processes

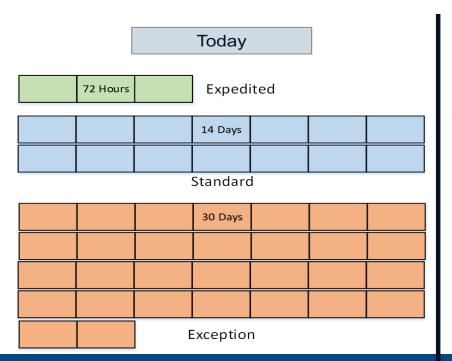

Begins in 2026.

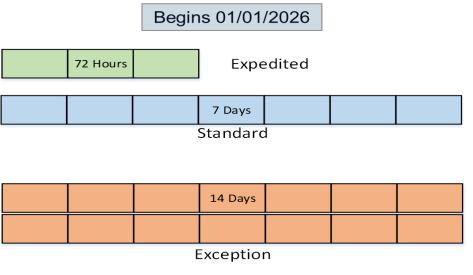

Applies to all PAs regardless of submission mode.

All business enhancements required whether the APIs are developed or used.

- Decision timeframes:72 hours for expedited; 7 days for standard decisions.
- ➤ Denials must return specific denial reasons to both patients and providers, no matter how submitted.
- ➤ Payers must publicly publish all services (non-drug) requiring PA.
- ➤ Payers must publicly publish metrics about PA processing statistics on an annual basis.

#### **Prior Authorization Review Time**

Applies to all non-drug PA requests no matter how submitted.

#### **Prior Authorization API**

- Begins January 1, 2027.
- Impacted payers must implement and maintain a set of Prior Authorization APIs unless exemption received.
- API must confirm if service requires PA and what documentation is required.
- API must support the creation and exchange of PA requests and responses from affected payers and providers.

#### Prior Authorization 2.0 Process Flow

#### CMS-0057-F Implementation Guide Proof of Concept Demonstration

#### **Use Case**

Patient: Jane Everhart

Age: 51 years old

Diagnosis: Type II Diabetes

Complaint: Tingling in extremities

Physician: Dr. Peter Abadir MD

Insurance: Maryland Medicaid

#### **Observations**

- Taking insulin by injection
- Testing glucose with finger pricks six times per day
- Uncontrolled A1C > 8%

#### Recommended treatment

External insulin pump

# Proof of Concept Demonstration

#### Lessons Learned

#### Lessons Learned – States and Payers

- Key effort will be in identifying and structuring PA criteria in a manner which is publishable and can be translated into machine readable resources.
- Business Operations for Medical Review will change.
- Build PA criteria and resources from similar examples, share results with other states.

#### Lessons Learned - Vendors

- Terminology Services are critical.
  - Use BillingCode extension to identify HCPCS on ServiceRequests.
- Work beyond the rule's minimum requirements must be done to complete the data sharing.
  - Use either full PA FHIR implementation guide or X12 275 to return questionnaire and other attachment results.
- Best practices and implementation guides will evolve.

# Prior Authorization Policy Documentation Hands On Exercise

#### Machine Processable PA Criteria

Machine processable PA criteria has 3 parts:

- Defining a searchable PA Service.
- 2. Defining the standardized coverage response.
- Defining the required supporting documentation needed for the PA review.

## Exercise:

Task	Time
Explain Activity	5 minutes
Participants translate PA policy into template	10 minutes
Review / discuss the results / effort / approach	10 minutes
Demonstration of web form to facilitate collaboration / leverage	10 minutes

# Next Steps

# Next Steps – MITA Governance

- Establish Interoperability Resources on MITA GitHub.
- Establish and strengthen a "Community of Practice" for sharing PA criteria, lessons learned.
- Participate in industry efforts to promote and explain the details of the CMS-0057-F Prior Authorization requirements.

#### Next Steps – States and MCOs

- Build plan to identify and publish all medical services requiring PA.
  - Must be available on website by 2026.
- Share and leverage PA criteria and resources with other states.
- Evaluate requirements and develop RFPs if appropriate.
- Prepare for operational changes for Medical Review staff.

# Next Steps - Vendors

- Participate in HL7 and CMS Connectathons to validate solutions.
- Include human-assisted workflow to reduce transaction errors which must resort to fax and portal resolutions.
- Build robust error resolution capabilities due to misaligned matching criteria or terminology service translation inconsistencies.

# Join the Community of Practice

The MITA Governance Board Interoperability Workgroup has established a bi-weekly "Community of Practice" meeting and working session to discuss aspects of CMS-0057-F including developing PA criteria maps.

Meetings are every other Monday beginning August 23 at Noon Pacific, 3 PM Eastern.

Contact XXX-XXXX to be added to the invitation.

#### Thank You
